A Guide to Race Timing

LEAD TIME

The Lead Time is the time it takes for the horse to travel
from the start of the race to the beginning of the last
mile. When it comes to the finish of the race, if it was a
slow Lead Time the horses at the front may be
advantaged, however, if it was a fast Lead Time, horses
from the rear of the field may be at an advantage as they
did not contest the early speed in the race.

At Addington Raceway for Mobile Start Races over
1950m 23 seconds or better would be considered a fast
Lead Time and 25 seconds or worse would be
considered a slow Lead Time, and for Mobile Start
Races over **2600m** 1 min. 14 seconds or better would be
considered a fast Lead Time and 1 min. 20 seconds or
worse would be considered a slow Lead Time. For
Standing Start Races the times are generally 3 to 4
seconds slower.

SECTIONAL TIME

There are four (4) Sectional Times in every race which
are made up of the four quarters of the last 1609m. An
exceptional set of sectionals are all below 30 seconds,
however, an acceptable set of sectionals would read –
30.5, 31.0, 29.5, 29.5 equalling the last mile in 2:00.5.

MILE RATE

This is a calculation applied to all distances so as to
give a comparison to a mile.

OVERALL TIME

This is the time taken to complete the distance of the
race.

At Addington Raceway for Mobile Start Races over
1950m an overall time of 2 min. 27 seconds or better
would be considered very acceptable, and for Mobile
Start Races over **2600m** an overall time of 3 min. 18
seconds or better would be considered very acceptable.
For Standing Start Races the times are generally 3 to 4
seconds slower.
