

# Notice to Participants

Please be advised that in the coming weeks RQ Stewards will be inspecting every sulky at race meetings to ensure compliance with HRA Sulky Standards.

- Every sulky inspected and approved for use will be photographed and allocated a compliance approval number.
- A compliance tag bearing this number will then be affixed to the sulky.
- Sulkies measuring wider than 1300mm are **NOT** approved for use.
- Stewards will not approve any sulkies which are identified as posing a risk to workplace health and safety. Such flaws will include cracks/fractures in shafts or wheels, extended axle length, etc.
- Inspections will take place at race meetings only and extra Stewards will be assigned for this purpose.

Information will be forthcoming as to when these inspections will commence.
